③ : 火を止めましたら、スープを入れて完成です。

# It's easy! **Microwavable Raw Ramen Noodles!!**

Recommended for the following reasons.

## Microwave preparation

1. Anyone can easily prepare ramen.
2. Add real ramen to any menu.
3. Smooth texture.
4. Flavor unique to uncooked ramen noodles.

Simply place the uncooked noodles and 450ml of hot water in a microwave-safe cup and microwave for 2 minutes and 30 seconds! Real Chinese food made simple!

## Energy-saving stores

1. For restaurants that prepare vast quantities of ramen, only trace amounts of the original ingredients remain when boiling this product. Accordingly the water used for boiling remains cleaner, so you can save time by changing the boiling water less!
2. Moreover, because this product requires less boiling water, you can also save money on water and gas bills!
3. This product is clean thanks to the trace amounts of ingredients leftover when cooking!

## Japanese-style pub (izakaya)

1. Perfect as the closer for hotpot dishes.
2. Even if you boil these noodles, they will remain firm. Also, the delicious flour flavor remains intact, so they bring additional flavor to any hotpot!

Add 450ml of hot water to a single-serving sized hotpot dish, boil the noodles for 2 minutes and 30 seconds, and just like that you have "Hotpot Ramen!"
